## "The Ghost of Carefree Cabin."

A Play to be given in KELLY'S HALL, under the auspices of the Stony Plain Basketball Team, on

**Easter Monday, April the 13th.**

A DANCE TO FOLLOW.

### On Easter Monday.

The Stony Plain basketball team the organization which is putting on the entertainment in Kelly's Hall on Monday, April 13, are now working on the playlet which is to be given there at that time. The name of this piece is "The Ghost of Carefree Cabin," with a large cast of well known young people. The play will be followed by a dance.

### Auction Sale March 16.

Mr W J Davidson, the enterprising farmer of the Holborn district, and who has been operating there for a number of years, has decided to retire from farming and has instructed Auctioneer Zucht to hold a clean-up sale on Monday next, March 16. The list includes a fairly large assortment of farm machinery, 8 horses, cattle, household goods, etc. The coming sale will afford an opportunity for farmers to acquire at their own price that piece of machinery which they now lack, or to replace implements which have seen their best days. Free lunch at noon, with the sale to start at 12 30 p.m.

### Our Enterprising Hockeyists.

Our Junior Hockey team boys, noted for the great successes which attend all their efforts at entertainment, scored another great success at the Enders rink on Thursday night, when they staged their skating party and broomball game. The latter contest was a popular event, and, altho the original plan was to have the competition between the Bachelors and Benedicts, it was not found possible to carry out this plan. However, despite this upset in the arrangements, everyone had a good time, and the hotdogs were all sold out long before Musical Director Trapp turned off the band music. The enterprising Juniors are now said to be working on anotner big entertainment, which is to be sprung as a big surprise on the public. The boys are arranging to give a play entitled "And the Cat Came Back."

### Manufacturers Losing Money

A committee of the Dominion Parliament will inquire why prices of farm implements have gone up so far and so fast in recent months; whether the advance has been justified by increased manufacturing costs, or just an attempt to kerp ahead of the game and collect some anticipatory profits.

One member, representing Brantfyrd, Ontario, where these implements are made extensively, said the advances were only a return toward proper trade conditions since the manufacturers had been losing money in former years.

In that event, the makers should have no objection to the inquiry, should welcome it, in fact. The country has no right to get farm implements or anything else at less than cost, and cannot in the long run.—Edmonton Bulletin.

## HARDWICK'S

YOUR HOME TOWN STORE.

## Education For Adults

To the testimony of others no less an authority than Dr. Walter C. Murray, president of the University of Saskatchewan recently added his opinion that there is a wide open field for educational facilities for adults and while he referred to conditions in the province in which he resides and teaches his assertion is equally applicable to the situation in the other prairie provinces.

While Dr. Murray pointed out that the development of his "unexplored field" is prevented at the present time for lack of finances he noted one very encouraging feature and that is that there was "a growing feeling of the need of education for themselves among the adults themselves."

The statement that this is an encouraging feature of the situation is no doubt inspired by the belief that if adults themselves realize the need the problem is already partially solved, for the desire will presently be followed by a more or less insistent demand and once this demand becomes sufficiently strong some way will assuredly be found to cater to the need.

This renaissance in embryo, this dawning desire on the part of adults for greater educational facilities may be ascribed to a number of causes. One of them is a growing fear lest in a world of rapidly changing conditions they may lag behind the growing consciousness of superior mentality on the part of the youngster generation.

During the depression period of the past few years the difficulty experienced by the rising generation of securing suitable employment, or even of any work at all, has resulted in a large number of the youth of both sexes remaining in school longer than, for many of them, would ordinarily have been the case. Many who would have gone out to work when they had completed a public school course or one or two years in high school, have completed high school training and gone on to University or taken post graduate courses in technical schools or other institutions, partly because they themselves sensed that when commercial and economic conditions improve they will be the better fitted for the keen struggle in competition for the work that then offers which is bound to ensue and partly because parents have felt that it is better that their offspring should spend this hiatus in improving their minds than in enforced idleness.

As a result many parents have discovered that their children are better trained and better mentally equipped than they are themselves, despite the years of experience they have had in the school of hard knocks. They have discovered that their children are able to handle with ease problems which they can only solve with painful effort and then, perhaps with much less adequacy. They have discovered that their children have learned to apply scientific methods with success in solving their problems and have had the chagrin to discover that their own "will to do", backed by years of experience has frequently failed to measure up in comparison with the more up-to-date methods of the juveniles.

Another cause of this stirring of a latent desire for more education may also be attributed to a substantial increase in the practice of reading of books and magazine and newspaper articles and more particularly on more serious subjects. This increase in reading can be traced to a desire to better understand the difficulties with which the world in general has been confronted in recent years and a hope through these channels to find some practicable solutions.

Now it is a sine qua non that the practice of reading inevitably brings about a revelation that the reader after all knows comparatively little and creates a thirst for more knowledge and more information. In this respect it is akin in its operation to the use of habit forming drugs but lacks the evil results of indulgence in narcotics. In fact, it has just the opposite effect, that of permanent stimulation. The natural sequence is a desire for the aid which the younger people are receiving in their institutions.

In schools and colleges and other educational institutions of the present day the whole aim of the courses is not to cram the students with a miscellany of facts, but rather to guide them in the selection of studies which may be of value to them and to train them to reach their own conclusions from the work they have undertaken. This is the true function of education. The more adult population appreciates this fact in the light of the demonstration which is being given them by the younger generation and are becoming increasingly anxious for similar opportunities.

### Another Victim Of X-Ray

Dr. Charles Harvey Archibald, of New York, a pioneer in the development of the X-ray, is dead at Asbury Park, N.J. In 1930 he lost the middle finger of his left hand because of X-ray burns, and in 1934 the left arm was amputated. The operation which brought about his death was made in an attempt to check further infection from burns.

### Generates Plenty

An answer finally has been found to the puzzling problem, "how much electricity does an electric eel generate?" The answer, said Christopher W. Coates, in charge of the tropical fish department of the New York Aquarium, was from 170 to 300 volts. Coats deduced his six foot electric eel will generate well over 300 volts, enough to kill a horse.

A HINT TO YOUNG HOSTESSES

DON'T RISK FAILURES ... You can't depend on making good cake unless you use good baking powder. Canada's leading cookery experts use and recommend Magic because they know from experience it is absolutely reliable—gives the same perfect leavening every time. And Magic is so inexpensive to use. ### Must Be Nice Song

**Budapest Police Say "Gloomy Sunday" Caused Many Suicides**

Budapest police have branded the song, "Gloomy Sunday," public menace No. 1 and asked all musicians and orchestras to co-operate in suppressing it, despatches said.

To its gloomy strains, the police attribute 18 suicides. The 18th, which moved the police to action, was Joseph Keller, a shoemaker. In a note to police he asked them to put on his grave 100 of the roses mentioned in the song.

Two other persons shot themselves while gypsies played the melancholy notes on violins as only Hungarian gypsies can. Some killed themselves while listening to it on a gramophone record in their homes. Two housemaids cut their employers' linens and paintings and then killed themselves after hearing the song drifting up into the servants' hall from dinner parties.

### A Real Spender

**Maharajah Bought Four Carloads Of Souvenirs In London**

When the Maharajah of Bhavnagar left London after his recent visit, the 24-year-old ruler of half a million people took home four carloads of souvenirs. He went to England with his wife, their two little sons, his two brothers, and a retinue of servants for a seven-weeks vacation. During that time he staggered shopkeepers by the magnificence of his purchases. It took a signwriter three days to paint the addresses on the 150 crates containing the maharajah's shopping. Dogs, sporting guns, furnishing fabrics, specially made cutlery, toys, clothing and a $5,000 automobile were on his list. Incubators for rearing chickens, apparatus for taking and exhibiting talking pictures, and kitchen utensils were other items.

### For Agricultural Research

**University Of Saskatchewan Receives Gift Of $24,000**

The Agricultural Research foundation of the University of Saskatchewan will receive a gift of approximately $24,000 for the advancement of agricultural experimental research. This gift will be made possible by enactment of the Saskatchewan legislature, whereby unclaimed assets of the Saskatchewan Co-operative Elevator Company will be paid over to the fund. The existing research fund was set up from the balances to the credit of the wheat board which operated the crop year of 1919-20. This amounted to approximately $225,000. The interest from the fund is used to carry on agricultural research work in the province.

Men Adore the Girl
WHOSE HEALTH IS PERFECT

IF you have a clear skin, pink cheeks, bright eyes, you will have many ardent admirers. A tonic that will help to nourish your body is Dr. Pierce's Golden Medical Discovery. It stimulates the appetite, improves the action of the stomach, makes the food digest better, and you gain strength and greater vitality. Also pimples and eruptions caused by faulty elimination often disappear.

Buy now of your neighborhood druggist. New size tablets 50 cents, liquid $1.00. Large size, tablets or liquid $1.35.

### Letters Are Returned

**Man Receives Three Out Of Five Thrown From Ships**

Leo Buring of Sydney, Australia, has just received the third letter of five he had "mailed" in bottles from ships in the Pacific Ocean months ago. One bottle, thrown overboard near the Tongan Isles was found, five months later, on the Fijian shore 900 miles away. Another floated 500 miles to the North Queensland coast. The third was thrown overboard near Pago Pago. This drifted to the Gilbert Islands and was found by a native who broke it, spent the six cents placed in the envelope for postage, on tobacco or beads, and tucked the letter, which he could not read, in his belt. There it was noticed by the captain of a trading schooner, who sent it back to Buring. 2141

Get Measured for Better Smoking!

"Pin your faith to Ogden's if you want a cigarette tobacco that's 'made to measure' for the man who wants a really better smoke—a milder, cooler, smoother cigarette.

"Satisfying? Why, there's 'an extra pair of Cheers' to every package of Ogdens Fine Cut! And now that times *are* better, roll-your-owners everywhere are buying the better tobacco—Ogden's. They should use the right papers, too—'Chantecler' or 'Vogue'."

OGDEN'S
FINE CUT

*P.S.—Your Pipe Knows Ogden's Cut Plug.*

### SELECTED RECIPES

**HOT CROSS BUNS**

1 cake compressed yeast
½ cup butter
1 teaspoon salt
½ cup white sugar
2 eggs
½ cup currants
5½ to 6 cups sifted Purity Flour
2 cups scalded milk (cooled)
½ teaspoon cinnamon (if desired)

Method: Dissolve yeast in lukewarm milk to which 1 tablespoon sugar has been added. Add 3 cups flour, beat until smooth and let rise until light (about 1¼ hours). Cream butter and sugar and add to sponge. Add well-beaten eggs, salt, currants, cinnamon, and sufficient flour to make a dough soft enough to be handled conveniently. Mix, turn out on board and knead lightly; place in greased bowl. Cover and let rise in warm place until double in bulk (about 1 to 1¼ hours), then shape into round buns; place in greased shallow pans about 2 inches apart; cover and let rise until light. Glaze with egg and water; press cross on each bun wtih back of a knife. Bake for 15 to 20 minutes in hot oven of 400 degrees.

### Live Stock Value

The Dominion Bureau of Statistics estimate the value of horses, cattle, sheep and swine in Saskatchewan during 1935 at $86,360,000. The value of farm poultry in this province also shows a considerable increase over 1934 having reached the sum of $5,299,000.

The European spruce sawfly has devastated thousands of acres of spruce forests in Canada, and this year has attacked evergreens in Connecticut.

There are 18 cities and towns named Union in the United States.

### Just Forgot To Stop

**Japanese Train Crew Penalized For Passing Important Station**

Two minutes late, an express train thundered through the station of Shimizu, Japan, one of the most important stops on the line, and left the station staff and prospective passengers astounded. The station master put in a hurry call to Okisu, the next station, and the train was stopped. Passengers for Shimizu were taken back by automobile. The train crew said they merely forgot to stop. They were penalized for negligence.

**Choice Was Appropriate**

Not many people watched the changing of the guard at St. James Palace one day recently. With visibility in Friary Court practically nil, there was nothing to see. But the band, barely discernible in the fog, was apparently determined to make an appropriate choice of music. The last tune they played before marching back to barracks was "Smoke Gets In Your Eyes."

ONLY FRUIT-A-TIVES GAVE LASTING RELIEF FROM CONSTIPATION

Constipation and stomach trouble banished quickly.

After suffering months from constipation, Mr. W. Huddlestone, Belleville, got *quick* relief from Fruit-a-tives. He says, "Constipation troubled me severely for months. Nothing did any good until I tried Fruit-a-tives. They brought me quick and complete relief."

A famous doctor made Fruit-a-tives by concentrating into convenient tablets extracts of APPLES, ORANGES, FIGS, PRUNES and HERBS. The result is a remedy as natural as it is effective. Fruit-a-tives bring, not just temporary relief, but relief that *lasts* because of their amazing tonic effects.

FRUIT-A-TIVES
Nature's Fruits and Herbs

# Strain Of Reward Wheat Accepted As Basis For Registered Seed Stocks

Since the naming of Reward wheat some fourteen years ago, its originators have made extensive studies of hundreds of selections with the hope of finding one which would produce more satisfactory yields than the original variety. A few Dominion Experimental Farms and private growers also have been carrying on a certain amount of selection work with the same objective.

During the past four years the best eight of these selections have been subjected to comprehensive tests at the Central Experimental Farm, Ottawa, the University of Alberta and the Dominion Experimental Stations at Swift Current, Scott, Lacombe and Beaverlodge. Extensive quality tests have also been made of the flour from each strain. As a result of these studies it has been found that while all eight strains are somewhat superior in yielding ability and equal in quality to the original more or less composite variety yet there is no real difference between the strains themselves. Since, however, one of these strains designated Reward 22-42, has been grown fairly widely in recent years and since it has proven to be as good as any it has been decided to accept this strain as the basis for future registered seed stocks for the variety.

A special block of this strain at the Dominion Experimental Station at Lacombe, Alberta, and another at the Central Experimental Farm, Ottawa, passed field inspection for registration as Elite Stock Seed during the past summer while samples from each block sown in the so-called "verification tests" also proved to be up to the required standard. The Canadian Seed Growers' Association therefore has decided to accept these stocks as Elite Stock Seed on the condition that the resulting crops in 1936 meet established requirements.

As a variety Reward has proven fairly satisfactory in many sections throughout the Prairie Provinces although disappointing in others. Its quality is universally accepted but its returns in bushels per acre have not always been what one would like.

The behaviour of this variety throughout the area seriously affected by rust in 1935 has won for it many friends as it gave a crop in many areas where neither Marquis nor Ceres was worth cutting.

The Elite Stock Seed of Reward 22-42 will be increased as rapidly as possible chiefly by members of the Canadian Seed Growers' Association. —J. G. C. Fraser, Central Experimental Farm, Ottawa, Canada.

## Canada's Clay Resources

**Development Is Being Encouraged By Department Of Mines**

In its endeavor to encourage the development of the Dominion's clay resources, the Federal Department of Mines maintains excellently equipped ceramic laboratories at Ottawa. Subjects of general interest to groups of manufacturers are investigated in detail, and technical advice and assistance in minor problems are freely given to individual manufacturers. The objects constantly being worked for are the improving and cheapening of processes of manufacture, and the aiding of the ceramic industry to produce better and wider ranges of ware.

## Himalayas Are Safer

**Woman Mountain Climber Prefers Them To Icy Street**

Dr. Jill Cossley-Batt, O.B.E., D.Sc., who climbed the Himalayan mountains with her husband, Dr. Irvin Baird, F.R.G.S., in 1933, has decided there are more dangerous enterprises than mountain climbing.

She slipped on the icy pavement in Vancouver fracturing an ankle and was forced to appear in a wheel chair when she addressed a meeting and told of her experiences on the icy, wind-swept roof of Asia.

People who have cold baths in winter never have colds. But they have cold baths.

## Solved Problem Herself

**Teacher Could Not Be Dismissed But Quits At 78**

Mrs. Dora Esper, a teacher in public school, 78, Pleasant avenue and East 119th street, New York, has resigned from the school system, thereby solving a problem which had puzzled school officials since 1924, when she reached the compulsory retirement age of 70. Mrs. Esper was the only teacher in the system who had not joined the Teachers' Retirement System. The pension board, therefore, was powerless to force her retirement at the compulsory age.

Mrs. Esper was appointed as a teacher on November 1, 1886. She resigned in 1906 but returned to the service in 1918. She did not join the pension system then, a privilege she was entitled to during her first three years in the system. At the end of the three-year period, however, the pension board allowed her to waive membership in its ranks, although the board later conceded the action was illegal.

In 1929 all teachers were required to join the retirement system. Mrs. Esper was 72 years old at that time, or two years older than the retirement age, and the pension board would not accept her. Thus she could have continued teaching as long as she wanted to, as the education laws do not permit the dismissal of a teacher solely because of age.

## Radio Weather Maps

**Four Liners Reported Clear Reception Of New Service**

Reports received from four liners on the Atlantic stated reception of complete weather maps by radio facsimile had been successful, according to Charles Pannill, president of the Radiomarine Corporation of America, which has just started the new safety-at-sea service.

The maps, showing winds and barometric pressures over the entire North Atlantic area, are prepared by the United States weather bureau and were transmitted daily to the liners on which the necessary extra equipment recently was installed. It is planned to equip all passenger ships with the receiving apparatus.

The new service, it was said, would aid materially in reducing uncertainty about the kind of weather ahead of ships.

## Made Smugglers Of Hens

**German Farmers Had Ingenious Scheme To Avoid Duty**

Eight German farmers of Rothenbach, on the Dutch frontier, have been sentenced to five months' imprisonment for making smugglers of their hens, says the London Times.

The farmers, whose lands lay on both sides of the frontier, conceived the idea of feeding their hens in Holland, where fodder is cheaper than in Germany, and then driving them over the German frontier to lay their eggs in Germany, where eggs are dearer than in Holland. This ingenious means of making the best of both countries was at last discovered by the customs authorities, but not before 2,000,000 eggs, according to the authorities' estimate, had been carried into Germany without payment of import duty.

**Easy To Identify**

"Have you seen that gorgeous dress in Whoisit's window? It's a sort of a funny color. Almost purple but with a little pink in it and a bluish tinge. You wouldn't exactly call it mauve. It has little jiggers all round the skirt that loop up with a little silver whickie on one side and has a long flowy thing on the shoulder with little whatnots on the end and a sort of a pinky yellow splash at the waist."

"Oh, you mean the one with the green what-you-may-call'ems on it?"

"Yes, that's it!"—The Humorist.

The average human thigh bone can support a weight of 1½ tons without breaking. 2141

## Industry Not Menaced

**Saskatchewan Can Mine Glauber Salts Cheaper Than Dakota**

Glauber salt discoveries in North Dakota are not considered a serious challenge to the considerable industry that has been built up in Saskatchewan, according to mining engineers employed by the provincial department of natural resources. The Dakota discoveries of last summer have been investigated to some extent by the engineers.

Saskatchewan plants sold 65,000 tons of the salt in 1934 and the figures for the last calendar year have not been compiled. Practically all of the Saskatchewan product is sold to paper mills in eastern Canada. The larger market in the United States has been lost to the industry.

The combined deposits of Glauber salt in Dakota are estimated at 20,000,000 tons. In a district south of Swift Current, Sask., one deposit is known to contain more than 25,000,000 tons. Mining engineers base the claim the Dakota deposits will not threaten the Saskatchewan industry on this: The Saskatchewan deposits are concentrated and the salt is found in layers 12 feet thick, while in Montana they are spread out and the deposit is thin. In other words, the Saskatchewan salt can be mined cheaper and, in addition, is said to be of higher quality.

## A Wrong Viewpoint

**World Not Getting Worse As So Many Think**

Charles M. Schwab, at the age of 74, says that this is a pretty good world, after all, and is getting better all the time.

And he may be right.

When one takes a long view of man's upward climb from the primordial ooze, the probability that he is right appears all the greater.

While the world still has its wars and rumors of war, while fear and hatred and intolerance have not yet been driven from it, while crime is rampant and the moral and ethical pendulums swing low, there is ground for hope, if one remembers that the course of human progress has never been steady, that ultimately even those ugly things will be measurably controlled.

The feeling which each generation has that the world is going to the dogs comes of its taking too short a view of human history.—Detroit Free Press.

**Find Fossilized Wood**

Workmen sinking a 200-foot shaft on the University of British Columbia endowment lands in Vancouver uncovered a small piece of fossilized wood more than 100,000 years old, according to scientists who have identified it as of the inter-glacial period.

There are over 55,000 black or brown bears, and over 5,100 grizzlies in the national forests of the United States and Canada.

# Wheat Grown In Fertilized Air Has Been Interesting Experiment At Washington

A rather new kind of farming—with fertilizer applied to the atmosphere instead of the soil—has been tried on a miniature scale at the Smithsonian Institute, Washington, with marked success. Wheat plants were grown by Dr. Earl S. Johnston of the division of radiation and organisms in atmosphere containing about four times the amount of carbon dioxide found in normal air.

It is from carbon dioxide taken out of the atmosphere and water that plants, through the process of photo-synthesis which takes place in light, build up their substance. On clear summer days sunlight is intense enough to increase the rate of photo-synthesis were this process not retarded by the limited amount of carbon dioxide available in normal air. In an atmosphere enriched with carbon dioxide, Dr. Johnston reports, the weight of straw, the number and weight of heads, and the number of grains were increased in comparison with plants grown in ordinary air.

The Smithsonian wheat fields were only four squars feet in area. They were enclosed on four sides with glass, leaving the tops open. Within this glass enclosure, around the growing plants, a fairly constant stream of carbon dioxide was kept up.

Although, there have been some attempts at aerial fertilization in Europe, the results have been uncertain and the practice is practically unknown in this country. As Dr. Johnston says in his report:

"The practical application of this type of fertilization in field experiments and the supply of carbon dioxide in sufficient amounts for practical field work are still unsolved problems, in spite of the work that has been done. While experiments in which carbon dioxide is used as an aerial fertilizer are of importance scientifically, the practical application of this type of fertilizer in commercial work is far from satisfactory, although its application to greenhouse culture appears to be most promising."

Because of the problem of confining the gas over large areas in open fields, he points out, there is at present little practical application of his results to open-air farming.

## What Parliamentarians Eat

**Chicken Pie Is One Favorite Dish Of Members**

Members of the House of Commons at Ottawa are definitely taking care of figures these days, passing budgets downstairs and passing up potatoes and pastry in the parliamentary restaurant. "They don't eat anything like the amount of starches they used to," Chef Rochon will tell you. Even so, they don't do badly.

Four hundred rolls and 30 loaves of bread disappear daily in the restaurant that seats 204 and serves about 400 meals a day. Fifteen bags of potatoes are peeled every week and 15 gallons of mayonnaise are made in the kitchens by machines. The peeler rubs off potato skins in an almost human way and the mixer stands high as a man.

The favorite parliamentary dish is chicken pie and the second on the list mixed grill. Sweets have vanished off the menu of many members but Henri Levesque, who has charge of the restaurant, says all the finicky dieting went out a couple of years ago and most of the men eat an average balanced meal.

All catering for affairs in the houses of parliament is done in the restaurant by a staff of 42, increased in emergencies to 62, who pride themselves on having carried food four floors down for King Edward when he was Prince of Wales and serving it piping hot.

## Will Now Admit Women

**Lady Senators And Secretaries Served By Senate Barber**

The Senate beauty parlor in Ottawa has lifted the ban on women. For years the Senate barber, a skilled technician who had cropped crowned heads and shaved princely whiskers, was prohibited from trimming up boyish bobs, or putting the waves in place when they got too wild.

A woman reporter crashed the purlieu, but was refused, and she revenged herself by revealing alleged secrets of mud baths and other beauty treatments with which the senators were presumed to grapple back their fading manly beauty. But it was all good clean fun, the Senate beauty parlor being only a barber shop.

With the advent of Senator Cairine Wilson, and recently of Senator Iva Fallis, the barber's bars are down and woman may now patronize the Senate barber shop. The women senators or the women secretaries may now get a brush up and a trim even though a score of senators sit on the waiting bench and fume.

## Would Reduce Expense

**Device Re-Inks Typewriter Ribbon And Prolongs Its Use**

"Any business man whose office force uses a large number of typewriters well knows the appreciable expense made necessary by the constant purchase of new typewriter ribbons. In the past, number of devices have been developed using various kinds of solutions to renew the brightness of color in old ribbons and thus prolong their life.

A new device consist of a small solvent container molded of Bakelite, through a side slot of which the typewriter ribbon may be passed while on the machine. It is only necessary to hold the device in position and wind the ribbons through from one end to the other once a week. It is claimed that such an application of the solvent will keep the ribbon in a soft and pliable condition, always ready to turn out sharp, bright, full color work.—Scientific American.

**Effective Police Club**

Delivering an electrical current powerful enough to help disperse rioting crowds, a new police club is available for law-enforcing officers. It is made of bakelite, with six metal rings at one end. If a rioter comes in contact with the rings while the policeman presses a button on the handle he receives a violent jolt. A small high-tension vibrator coil and small flashlight batteries produce the shock.—Popular Mechanics.

**Loan Board Made Profit**

The Canadian farm loan board made a profit of $59,592 for the fiscal year ended March 31, 1935, according to a statement recently filed in the House of Commons. Accounts for the present fiscal year have not been closed, so figures are not available.

## Knit Tot A Coat For Spring

PATTERN 5545

Too adorable for words!—a youthful coat and matching beret in which to turn your Youngest out in style this spring. Quickly knitted in sports yarn, the coat is mainly just plain knitting with yoke and cuffs in a contrasting striped effect—a simple combination of knitting and purling. The natty beret employs the same striped effect, with wool pompon for finishing. Any tot, aged four-to-eight can don both in a jiffy.

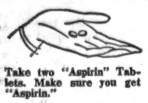
In pattern 5545 you will find complete instructions for a knitted coat and beret; illustrations of them and of all stitches needed; material requirements. Directions for sizes 4, 6 and 8 are all given in one pattern.

To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 176 McDermot Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

## 2 Things That Combat Colds Like Magic!

**Ask Any Doctor . . . Then Follow Simple Directions Pictured Below. *Quickest, Simplest Way***



1. Take two "Aspirin" Tablets. Make sure you get "Aspirin."

2. Drink a full glass of water. Repeat treatment in 2 hours.

Instead of using fancy priced "cold remedies" try the new-day cold treatment pictured here. Your own doctor will approve it. It will start easing the average cold or sore throat almost as fast as you caught it.

The "Aspirin" you take will start combating your cold internally at once; if throat is sore, crush and stir 3 "Aspirin" Tablets in a third of a glass of water; gargle twice. Do not rinse mouth.

"Aspirin" Tablets are made in Canada. "Aspirin" is the registered trade-mark of the Bayer Company, Limited. Look for the name Bayer in the form of a cross on every tablet.

DEMAND AND GET **"ASPIRIN"**

## WORLD HAPPENINGS BRIEFLY TOLD

Italy has blocked off the southern tip of Sardinia and the north coast of Cyrenaica in northern Africa, to foreign fliers.

Great Britain's great Singapore naval base will be ready for general use in 1939, Kenneth Lindsay, civil lord of the admiralty, announced in the British House of Commons.

Dame Laura Knight, famous British artist, has been elected a Royal Academician, said to be the first woman R.A. since Angelica Kauffman in the 18th century.

Germany officially informed Great Britain she is willing to negotiate a bilateral agreement limiting the size of battleships, cruisers, destroyers, aircraft carriers and submarines.

Lord Tweedsmuir will open the new federal museum at historic Louisburg when he pays an official visit to Cape Breton in July. The museum will house interesting relics of "the Dunkirk of America."

Revenue Minister Ilsley announced in the House of Commons that complete ball and roller bearings, imported for use in traction engines, including farm tractors, would be admitted free in the future.

First appointee to the Senate under the commission of King Edward VIII., Hon. William Duff, former Liberal member of the House of Commons, was sworn in during a brief session of the upper house.

Last year 113 loans were made by the government under the Dominion Housing Act, Finance Minister Dunning told the House of Commons. These loans ranged from $3,000 to $10,000.

To harvest kelp from the sea, one California company uses a special mowing machine towed by a barge.

To get the reputation for being intelligent try the habit of thinking.

## Here's Real Help In Avoiding Many Miserable Colds

**Unique Medication Designed to Aid Nature's Defenses in Nose and Throat, Where Most Colds Start.**

**PROVED IN USE BY MILLIONS**

In the exclusive formula of Vicks Va-tro-nol has been found a unique and successful aid in preventing many colds—winter's threat to our comfort and health.

Va-tro-nol is especially designed for the nose and upper throat—where most colds start. It aids and stimulates the functions provided by Nature—in the nose—to prevent colds, and to throw off head colds in the early stages. Used in time—at the first nasal irritation, sniffle, or sneeze—just a few drops up each nostril—Va-tro-nol helps to avoid many colds.

Where irritation has led to a clogged-up nose (a stuffy head cold or nasal catarrh) Va-tro-nol reduces swollen membranes—clears clogging mucus—brings comforting relief.

**For Fewer and Shorter Colds**

Note to mothers—who guard the family's health: Vicks has developed, especially for you, a practical Plan for Better Home Control of Colds. This guide to *fewer* and *shorter* colds has been clinically tested by practicing physicians and further proved in everyday home use by millions. Full details of Vicks Plan in each Va-tro-nol package.

### Conferred Decorations

**First Investiture By King Edward Was Brilliant Ceremony**

The first investiture of King Edward's reign took place in Buckingham Palace, where he conferred honors and decorations awarded by his father, the late King George V., in the New Year's list, and decorating with the Royal Victorian Order the sailors and soldiers who participated in King George's funeral.

The brilliant ceremony took place in the white and gold Throne Room on the ground floor of the Palace, with the King in the blue and gold full-dress uniform of an Admiral of the Fleet, attended by the Acting Lord Chamberlain, Sir George Crichton, and the great officers of the Royal Household.

Outside the Palace, the guard of honor of Coldstream Guards presented arms and the band played the National Anthem. Crowds saw the officers and men of the Navy and Army march to the Palace to be decorated by the King.

First came a battery of the Royal Horse Artillery who drew the gun carriage at Sandringham; then men of the King's Company of Grenadier Guards, who acted as bearers; followed by men of the Royal Horse Guards and Life Guards and 300 bluejackets of the gun-teams who drew the gun carriage in the funeral processions at London and Windsor.

The officers were invested with various degrees of the Victorian Order and the men were decorated with the medal of the same order.

### Great Lakes Hold Millions

**Valuable Cargoes Went Down With Many Wrecked Ships**

"That's gold in them Great Lakes"—and coal and whisky, too.

The treasure, estimated to be worth more than $20,000,000, lies in the sunken hulks scattered on the floor of North America's great inland seaway. Nobody knows the grand total but in the last 70 years more than 2,000 ships have been lost in the five lakes.

Strung out in a row there would be a wreck every half mile in the 1,100 miles from Buffalo at the foot of the lakes to Duluth at the head. The gold is there but in meagre quantity. The real money lies in coal and whisky.

Three of the better known carriers of "firewater" were the Lexington, which vanished with 110 barrels between Cleveland and Port Huron; the Anthony Wayne, lost in Lake Erie with 300 barrels of whisky and wine, and the Westmoreland, wrecked near Manitou Island with a similar cargo. Submerged freighters hold thousands of tons of coal.

Seekers of heavier stuff would find $50,000 worth of pig zinc in the holds of the Dean Richard; $20,000 in steel billets in the Foy and $50,000 in copper in the City of Detroit.

Successful salvage jobs have paid well. The Atlantic, located 25 years after it sank, gave up $30,000; the Erie, brought up 14 years after foundering, had $180,000 in immigrant savings; and Capt. Harris W. Baker, of Detroit, earned $50,000 by salvaging the William H. Stevens.

Playwright: "And you're going to produce my play?"

Producer: "Certainly. Willie, dig down into the wastebasket and produce Mr. Filbert's play." 2141

## SUNDAY SCHOOL LESSON

MARCH 15

**JESUS TEACHES HIS DISCIPLES TO PRAY**

Golden text: If we ask anything according to his will, he heareth us. I. John 5:14.

Lesson: Luke 11.

Devotional reading: Matthew 6: 6-15.

**Explanations And Comments**

**A Disciple's Request,** Luke 11:1-2. Matthew gives "The Lord's Prayer" in fuller form in "The Sermon on the Mount," and associates it with Jesus' warning against the insincere prayers of the Pharisees. Luke tells us nothing about the time or place: "It came to pass" he says, "as Jesus was praying in a certain place, that one of his disciples desired him to teach them to pray as John the Baptist had taught his disciples." Nothing is known about John's teaching upon prayer, but rabbis were in the habit of prescribing definite forms.

**The Lord's Prayer,** Luke 11:2-4. In answer to the only request of the disciples, as far as the Gospel records go, for instruction, Jesus taught them the prayer of which Matthew gives a longer version. When you pray, say, Father, thy name be revered, thy reign begin; give us our bread for the morrow day by day; and forgive us our sins, for we do forgive everyone who has offended us; and lead us not into temptation (Moffatts translation). The clause "Who art in heaven" expresses in a characteristically Jewish way, A. E. Garvie comments, the reverence for God which the address "Father" might seem to lack. Thy name, as we often have occasion to observe, stands in the Scriptures for thyself. Thy Kingdom come.

"Lord, when we pray, Thy Kingdom come!'
Then fold our hands without a care
For souls whom thou hast died to save,
We do but mock thee with our prayer."

The petition for "bread" implies that we may ask for any physical good. Yet we need to keep in mind the words of Canon Farrar that to ask mainly for earthly blessings is a "dreadful dwarfing of the grandeur of prayer, as though you asked for a handful of grass when you might ask for a handful of emeralds."

"Give us this day our daily bread,
we pray,
And give us likewise, Lord,
our daily thought,
That our poor souls may
strengthen as they ought,
And starve not on the husks of
yesterday" (Phillips Brooks).

Forgive us as we ourselves forgive. It is not possible to receive love from God while we are filled with hatred to men; until we have the spirit which forgives we have not the spirit which can be forgiven.

**Watch Made Into Clock**

Years of faithful service feature a British watch said to have been made in 1760. It has been converted into a clock at Marrickville, New South Wales. And it still goes on ticking. The work of Eardley Norton, an eighteenth century British clock maker, it is now owned by Mr. E. Powning, a jeweller. The watch keeps splendid time.

## Lacy Neckwear For the Making

Household Arts by Alice Brooks

They Almost Crochet Themselves

PATTERN 5397

Fresh, youthful, charming—these lovely, lacy collars have truly captured Spring's own spirit! What's more, they'll make one frock look like three. The top one resembling flower petals, is quickly done in petit boucle, or colored string. Crochet cotton makes the simple one with ruffled edge at the upper right. While that lacy bib 'n' tucker is so easy to crochet, a beginner will want to make that one first.

In pattern 5397 you will find complete instructions for making the collars shown; an illustration of them and of the stitches needed; material requirements.

To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

**There is no Alice Brooks pattern book published**

### Expense To Great Britain

**War In Ethiopia Is Costing Empire $150,000 A Day**

The Ethiopian-Italian war is costing Great Britain something over $150,000 a day. This is because Britain has had to take certain emergency measures in order to insure herself against aggression in the Mediterranean area. She has shifted the bulk of her fleet to those waters and strengthened her positions in Malta and Gibraltar. Nor is the end yet in sight. It has just been announced that Britain's biggest battleship, the Hood, will soon leave again for the vicinity of Gibraltar, and when she has arrived, "the total of British ships in and near the Mediterranean" will be 158, "compared with the 157 gathered there just a month ago." All of which ought to be a fairly pat illustration of the extravagant cost of fighting even to the nations that do not fight. —Baltimore Sun.

**Has Far-Reaching Effect**

What happens on land may very often affect fishing in the water. For instance, removing forests and draining swamps tends to increase spring floods and brings about summer droughts in the streams, and both flood conditions and drought conditions may affect fishing.

Trout have been known to live in captivity for more than 20 years.

### Making Reservations Early

**People Already Asking For Seats For Coronation Procession**

Although King Edward's coronation is not to take place before next year, people are writing from all parts of the empire for seats in stands or at windows along the route of the procession. Fantastic prices are being offered but no business can be done as the route to be followed by the procession has not been fixed. So the applications are being filed pending announcement of the arrangements.

The ten commandments cannot be repealed; they can only be violated.

## LAME BACK

Gin Pills give prompt relief from backache resulting from deranged kidneys. They soothe and heal irritated tissues and assist the kidneys in their function of eliminating poisonous waste matter from the system. 248

Just hang a package in your kitchen. You'll be delighted with its convenience . . for, with one hand, you can easily extract a single sheet at a time leaving the other hand free to hold the "left-over" being wrapped

Warehouses At Calgary, Edmonton, Regina and Winnipeg

# LARGER MARKET IN BRITAIN AIM OF POULTRYMEN

Ottawa.—The associate committee on market poultry which met at Ottawa decided on a program of "improved' poultry production for Canada. The purpose is to enlarge the output of high quality market poultry so that much greater advantage can be taken of the British market.

This was the first meeting of this committee. It was held under auspices of the department of agriculture and the national research council and embraced delegates from the provincial institutions such as agricultural departments, universities, etc., as well as from the trade. Upward of 40 papers dealing with problems confronting the poultry industry were read or filed.

Future activity in the fields of research and of government was discussed and a program which will avoid duplication of effort agreed upon.

The most important decision, however, from the standpoint of poultry producers was the decision to go after the British market. Emphasis upon increased production will be constant in coming months. Great Britain imports from 60,000,000 to 70,000,000 pounds of market poultry per year. Canada's share, while increasing, is only three or four million pounds. There is room, it was agreed, for tremendous expansion, with good returns to producers.

## Traffic Nearly Doubled

**Canada's Air Mail And Freight Heavy Last Year**

Ottawa.—Canada's airways almost doubled their freight and mail traffic in 1935 and carried mail tonnage second only to that of the United States, according to a statement issued by Defence Minister Mackenzie.

Figures contained in the statement tell this story:

Freight and express matter carried by air last year amounted to 26,439,224 pounds, compared with 14,441,179 in 1934 and 4,205,901 in 1933.

Aviation companies carried 177-472 passengers last year compared with 105,306 in 1934 and 85,006 in 1933. The number of "passenger miles" increased correspondingly.

Vital statistics show four pilots were killed in 1935, the same number as in 1934. In 1933 eight were killed. Six flying men were injured last year against seven in 1934 and seven in 1933.

Seven passengers were injured last year, three in 1934 and six in 1933. Last year's accidents totalled 15, an increase of one over 1934, but a decrease of four from 1933.

## Believes War Just Started

**Ethiopia Far From Being Beaten Says Emperor Selassie**

Addis Ababa.—Far from regarding Ethiopia as a conquered nation, Emperor Haile Selassie feels the war has only begun, he said in a message despatched to this capital from "somewhere on the northern front."

It was confirmed at the same time that the negus had left his imperial base at Dessye on Feb. 21, heading for the sector where Italy since has claimed decisive victories.

"The war is only beginning," the emperor said in his declaration. "Ethiopians ought never to believe what the Italians say regarding victories and the number of dead and wounded."

Paris.—Foreign Minister Pierre-Etienne Flandin has appealed to Premier Mussolini to accept quickly League of Nations peace negotiations, a well-informed source said.

Flandin instructed the French ambassador to Rome to tell il duce, this source said, that France would be "unable to intercede for Italy again at Geneva without seriously compromising her political situation in Europe."

Seven thousand English widows gave up their pensions on remarriage in 1934.

## New Road Suggested

**Hard Surfaced Highway From Edmonton To Aklavik A Possibility**

Calgary. — The Calgary Herald published the following:

Possibility that a hard surfaced road may be built from Edmonton to Aklavik, in the North West Territories, then down to Alaska and Asia is being considered by United States capitalists.

This ambitious undertaking for the future—which would ultimately cost $500,000,000—has the backing of New York and Los Angeles capital, the Herald was informed. Huge cost of the road which would connect Alaska and Siberia via tunnel, would be made up from tolls charged on the highway.

Edmonton.—Proposing to build a hard-surfaced highway from Edmonton to Aklavik as a link in a projected $500,000,000 highway system connecting with Siberia, agents professing to represent New York bankers, recently interviewed Hon. W. A. Fallow, minister of public works, it was revealed by the minister. "I am satisfied they are in earnest and that the highway eventually will be built," Mr. Fallow said.

## Prize List Issued

**Sum Of $5,000 Offered Exhibitors At Saskatchewan Winter Fair**

Regina.—A total of $5,000 is being offered as prize money at the Saskatchewan Winter Fair to be held in Regina, March 24 to 27, inclusive. Three thousand dollars is offered in prize money for horses and the balance for cattle.

The official prize list has just been issued. Cattle entries have closed, and horse entries close Saturday, March 14. It was necessary to close the cattle entries early so that sufficient time might be given for the testing of exhibits for tuberculosis. The latter service is given free by the Dominion Health of Animals branch.

All beef cattle exhibits may be entered in the Fat Cattle Auction Sale held on the afternoon of Wednesday, March 25.

Railway companies have announced reduce passenger rate in effect March 23 to 30.

## Kansas Hopes For Crop

**Wheat Which Was Believed Dead Starting To Grow**

Garden City, Kas.—Greening wheat fields in the southwest bread basket have revived hopes of farmers for a 1936 wheat crop.

In southwestern Kansas, normally heart of the winter wheat belt but last year centre of the dust bowl, farmers reported wheat, earlier believed dead, was pushing through the dust-covered fields.

The consensus was that the wheat had an excellent chance to survive and with timely spring rains would produce a least half a crop. Tom Armstrong, Kansas state grain inspector, said after a trip over the state, that 75 per cent. of the wheat had survived the cold winter and 50 per cent. was in good condition.

## To Form New Cabinet

**Japanese Emperor Has Chosen Foreign Minister As Premier**

Tokyo. — Emperor Hirohito commanded Foreign Minister Koki Hirota to attempt to form a new cabinet to take the place of that of Premier Keisuke Okada, decimated by the recent military rebellion.

The veteran foreign minister was chosen for the premiership after Prince Konoye, originally chosen by the emperor upon the advice of Prince Saionji, senior elder statesman, declined the post on the grounds of ill health.

The military side of the liquidation of the Japanese emergency advanced with establishment of a special tribunal to try for treason 22 officers who participated in last week's coup.

**Installing New Organ**

London.—A new $100,000 organ to replace the present 200-year-old instrument, which has played at many historic ceremonies, will be installed in Westminster Abbey for the coronation of King Edward VIII., expected to take place next year. 2141

ON COMMISSION

Mr. Justice Archambault, judge of the Quebec Supreme Court, who will head the royal commission set up to study the administration of Canada's penal system and the possibilities of its improvement and reform.

## China Starts Conscription

**Men 18 To 45 Have To Take Military Training**

London.—A Reuters News Agency dispatch from Nanking said the central Chinese government had announced military conscription throughout the country.

The dispatch stated the measure provided for two years' military training for all able-bodied men between the ages of 18 and 45.

In unofficial London circles, the order was interpreted as the most daring attempt yet made by China's Nanking government to counter the Japanese policy in north China.

## Police Officers Dismissed

**Nine Toronto Men Have Lost Positions On Force**

Toronto.—The Toronto police commission carried out recommendations of the royal commission which probed Toronto police affairs for dismissal of nine police officers. Judgment on 15 others accused of robbery was reserved pending receipt of a report by Chief D. C. Draper.

The commission will make its own decision as to whether the 15 men, suspended since December shall be restored to the force.

**Early Action Promised**

Ottawa. — Legislation to provide for equalizing payments to farmers on 1930 pool wheat will be introduced in parliament within a fortnight, Prime Minister Mackenzie told the House of Commons.

## Preparing For Debate

**Instructions Given To Draft Amendment To B.N.A. Act**

Montreal.—Instructions have been given to prepare a draft bill providing for amendment of the British North America Act by Canadian authority alone and, when approved by the inter-provincial conference, to be sent to the various legislatures for discussion.

Premier L. A. Taschereau made the declaration after his return from Ottawa where he took part in a conference dealing with constitutional amendments. He said the draft bill would be laid before members of the Quebec legislature early in the session that opens March 24.

The various legislatures will be asked to return the draft to Ottawa with endorsation or with suggestions for changes and the next step will be for the Dominion parliament to take action, the Quebec premier said.

The opinion in Ottawa, said the premier, was that there would be no objection in Britain if it were found it was the general Canadian will that change should be made.

## Australia's Defence Plan

**Expenditure For Arms Is Likely To Exceed $35,000,000**

Melbourne, Australia.—Prime Minister J. A. Lyons indicated Australia's defence expenditures will be augmented following publication of the British government's white paper on expansion of Britain defences.

He told a deputation here it was impossible to promise cuts in taxation until a decision had been made on the defence question.

Official circles predicted the defence expenditure in the commonwealth was likely to exceed the estimated figure of £7,000,000 (about $35,000,000).

Dr. Lyons said the white paper would have "a very important effect" on Australia's policy.

## Making Western Tour

**Governor-General Plans To Start Trip In August**

Ottawa, Ont. — Lord Tweedsmuir, governor-general of Canada, will make his first tour of western Canada this summer. Tentative plans for this tour call for the vice-regal party to leave Ottawa late in July, but it will probably be the first week of August before the tour begins. Lord Tweedsmuir plans to spend as much time as possible in the pioneer districts of the west. His visits to the larger centres will be cut down to the minimum.

NATIONAL MONUMENT TO KING GEORGE V.

Very shortly plans will be drawn up in England to erect a national monument to King George V. It is expected it will be similar to that of his late father, King Edward VII. (above), which stands at the top of the Duke of York's steps which lead into the Mall. Behind the monument is the German Embassy.

# REDISTRIBUTION OF RIDINGS HAS BEEN SUGGESTED

Ottawa, Ont.—Behind the motion sponsored in the commons by Hon. Ernest Lapointe, minister of justice, to refer the problem of redistribution to the special committee on electoral reform lies a hope that this cause of political strife may be removed.

It is learned the government proposes to suggest in committee that all political parties agree to remove redistribution from politics and make it a judicial function to be carried out by an official in whom all parties have confidence. This, it is thought, would be much better than the present system of having redistribution carried out by the government which happens to be in power at the time. Under the B.N.A. Act, seats in the commons are redistributed after each decennial census. The next one will be taken in 1941.

The difficulty in the Lapointe proposal, it is conceded, is to find the official in whom all parties have confidence. But such a man, it is said, is available in the person of Col. John Thompson, present administrator of the Franchise Act. Col. Thompson carried out his functions so fairly last year that all parties were demanding his dismissal but, in retrospect, it is agreed that he acted in an entirely nonpartisan manner.

There is no intention, it is learned, to force this reform through the committee and the commons. It will be presented as a suggestion and will not be gone on with unless the other parties consent.

## Medical Service Planned

**Revised Health Insurance Bill Coming Before B.C. House**

Victoria, B.C.—A plan making available essential medical services for about 125,000 employees and their families, some 300,000 persons in all, is contained in the revised health insurance bill expected to be introduced in the British Columbia legislature shortly. Provisions of the revised bill were announced by Hon. G. M. Weir, provincial secretary. The average cost to the wage earner would be 40 cents a week.

Medical care by the physician or surgeon chosen by the insured person, free hospital care, services of diagnostic laboratories, necessary drugs and medicines and a maternity cash benefit of $20, were "mandatory benefits." Various other medical services are "permissive benefits" which may be granted if sufficient funds are available after payments of mandatory benefits.

The bill deals with the family as a unit, including dependent wives and children with their wage-earner husbands, as insured persons.

## Conference In Saskatoon

**Game Commissioners Of Western Provinces Invited To Attend**

Saskatoon. — Arrangements have been completed for a western Canada wild life conference in Saskatoon on March 23.

The inter-provincial council, representing Saskatchewan, Manitoba and Alberta, will meet, and the Saskatchewan game commissioner is inviting the game commissioners of Alberta, Manitoba and British Columbia to attend.

Manitoba sportsmen and conservationists will be represented by E. B. Pitblado, K.C.; W. J. Hill, Col. Poussette and B. W. Cartwright. Alberta will send President Wyman of the Alberta Fish and Game Association, Norman Fraser, L. Wize and Arthur Burns, past president. These delegations will likely be added to.

**More Sabotage Cases**

London.—The admiralty announced two new cases of suspected sabotage had occurred on the battle cruiser Repulse and the submarine H-28. The Repulse was being prepared at Portsmouth to join the Mediterranean fleet. The submarine is attached to the sixth flotilla at Portland.

## MOISTURE APLENTY.

Father Hubbard, the "Glacier Priest," tells Western farmers they need have no fear of drouth during the next three years. His prediction is said to be worthy of attention: it is not the babbling of a crystal-gazer, but the judgment of a trained and world-famous meteorologist. It is based on long observation, study and clear-headed reasoning.

It is coming to be accepted that the weather of the prairie country is made in and around the Aleutian Islands. This is where the storms are born, and where the high and low pressure waves start from. Perhaps because this is where the warm Japanese current comes into contact with the cold air and water flowing down thru Behring Straits.

On that assumption, and on the assumption that rain and drouth move in a cycle corresponding to the astronomical cycle of 13 years, the Father bases his forecast for a plentiful supply of moisture for the prairie crops during the three following summers.

## BLOOD TESTS FOR DRUNKEN DRIVERS.

Pretty soon it's going to be tough for the motorists who drink and drive. An eminent English surgeon insists that blood tests of those involved in automobile accidents should be made. The percentage of alcohol in the blood, and not the quantity in the stomach, was the real factor.

A formula had been easily determined by an expert, and was—one drop of alcohol in 700 drops of blood produced definite signs of drunkenness, and one drop of alcohol in 500 drops of blood produced symptoms of dead drunkenness.

Such tests should be made applicable to all persons involved in accidents on the highways, and a movement has been started in Great Britain to have the test-making enforced by law.

## FIRE-RETARDENT WOOD CHEMISTRY'S LATEST.

Coinciding with the statement of United States builders and insurance men that the United States fire losses for 1935 amounted to 10,000 human lives and cost 245 million dollare, comes a report from the National Board of Fire Underwriters containing an assurance that there is such a thing as fire-retardent wood.

The wood tested by the Board was red oak and maple which had been thoroly and uniformly impregnated in pressure tanks containing ammonium salts, a fireproofing compound which, it is not perhaps generally known, has actually been procurable in Canada for at least two years. The treated wood is almost the same in appearance as ordinary wood but is a little heavier because of the salt content. It is easily tooled and takes varnish well.

The investigators of the Board tested the treated wood under conditions which sent untreated walls and floors roaring up in flames while the treated wood did not burn at all but ufter a long period of exposure to the fierce heat was deeply charred. Not once, however, did the treated wood flame or aid the spread of combustion. The National Board of Fire Underwriters' final verdict was that the wood was non-inflammable.

### If—and also When.

Absolute knowledge have I none,
But my aunt's washerwoman's sister's son
Heard a policeman on his beat
Say to a laborer on the street
That he had a letter just last week
Written in the finest Greek,
From a Chinese coolie in Timbuctoo
Who said the natives of Cuba knew
Of a colored man in a Texas town
who got it straight from a circus clown
That a man in the Klondike heard the news
From a bunch of good Jerusalem Jews,
About somebody out in Borneo,
Who'd heard of a man who claimed to know
Of a swell society ma'moiselle
Whose mother-in-law knows certainly well
That her second husband's sister's niece
Has stated in a printed piece
That she has a son on whose word she depends
Who knows when we'll get Basic Dividends.

### Open Seasons forGame.

Deer, moose, Nov. 1 to Dec. 14
Ducks, geese, Sept. 16 to Nov. 14
Elk, Oct. 1—Dec. 14
Grouse, Oct. 1—10
Hungarian Partridge, Oct. 1—Nov 30
Fox, Nov. 1—Jan. 31
Mink, martin, otter, Nov. 1—March 31
Muskrat, Mar. 1—April 30 South of N. Saskatchewan river, no open season,
Sunday Shooting is prohibited.
Licenses may be procured at The Sun office

### Weak with the Grippe.

Miss Anna Repko, 10845 98th St. Edmonton, writes—

"I was so weak with the Grippe that it made me quite helpless. A friend told me to try Dr. Martin's Tonic Remedy. And it certainly got me on my feet, and built up my strength. That I wish to let everyone know of this Remedy. How quickly it acts and how reliable it is. Children will take it readily, no mixing or ussing. It contains no Laxatives or or Narcotics. A quick acting tonic that builds up your Vitality. Dr. Emile Martin's valuable remedy for Coughs, Colds and La Grippe. Large bottle, price, 75c., at Hayes Drug Store Stony Plain.

# FLEMING'S FOLLY

— BY —

LAWRENCE A. KEATING

CHAPTER VIII.—Continued

"You mentioned a hundred an acre?" Link tapped Pieper's bony knee. "I won't sell my share for less than two hundred an acre, two years from now. And my whole Star Loop'll go away up in value. So'll the Triple H. If irrigation works other places, it'll work here. Now Otto, you're a man of vision, of foresight. That's why you're a success to-day, and we know it! Isn't that so, Helen?"

She came promptly to the rescue. "I've heard Father say many times how shrewd you are, Mr. Pieper. That's why Link and I always come to you. We could go to Sol Hastings over in Atlas, but he wouldn't grasp the bigness of this thing. We have confidence in the Stockmen's Bank. Why, everyone has!"

Instinctively Pieper thrust his thumbs into the armholes of his vest. He started to lean back but remembered a box of cigars, and bent to open a drawer for them. Link accepted one and struck a match while Otto puffed. Smoking comfortably, he studied his visitors.

"How much is this thing to cost, did you say?"

"Oh, not much over twelve hundred."

The banker jerked forward in his chair, then settled back shaking his head. "You two should've been satisfied as you were. But no, you had to plaster mortgages and notes over your spreads tryin' to improve God's handiwork.

"Why not take a loan on your steers? Or have you done that elsewhere?" he demanded suspiciously.

Fleming smiled. "We trade here, Otto, unless you drive us away. Of course, I did hear Hastings has a lot of cash to lend, now he's increased his capitalization. But here's the thing: we need this small matter of eight hundred for our payroll. Got 27 men working on the dam, Otto, and she'll be finished in a couple of days. We don't want to encumber our steers; we want to get cash for them. It'll just about finish up things."

There was a moment's silence. "The pair of you owe me two thousand on a note now. There's first mortgages besides. Link, I gave you five hundred last Tuesday—"

He broke off as the girl uttered a gasp. But quickly she changed her surprised expression to a smile. "Then you'll give us the money, Mr. Pieper?"

His eyes seemed to bore through her. Of a sudden he scowled and swung away. "Can't see my way clear. Sorry. Good-day!"

Helen's heart seemed to fall in her breast. Fleming's countenance went a shade paler and his lips held apart as if he were utterly nonplussed. At last he sighed, flicked ashes from his cigar, and rose. She followed suit, her eyes hot, with the threat of mistiness welling to their brown depths.

"Don't know what we'll do," Link said regretfully. "Go see Sol Hastings is all we can do. Too bad. Helen and I agreed yuh've been so considerate, Otto, that we wanted to show our appreciation with fifty acres of land when it's irrigated. You could sell it for two hundred an acre."

Pieper resisted the impulse a moment, then swung around. "Sit down, sit down! Let me think this over once more." He pursed his lips, eyes fastened on the floor.

Inwardly the quick-moving president of the Stockmen's Bank was squirming, and his visitors knew it. If he refused the loan they would ride at once to Atlas and doubtless obtain money from his rival, the First National Bank there.

At first he had disapproved Link's plan to build the irrigation dam. Yet . . . Otto Pieper was no fool. Yesterday, riding to view the dam, he had received a shock. He had talked with Tom McLendon, the engineer in charge; he had examined blueprints and viewed every angle of the undertaking. The dam itself was small as such projects went, barricading the sharp rocky V which Silver Creek had worn over the centuries. Construction was simple, McLendon pointed out, since the Creek had been successfully diverted during the work. A half-mile long miniature lake would be created to irrigate by means of ditches Fleming's seventeen hundred and Helen Hamilton's nine hundred acres into a productive Paradise.

Pieper could not shake off the conviction that there would be a five hundred per cent. increase in the value of the two ranches and their wasteland. The notion of fifty acres as a sign of appreciation . . .

He did not notice Helen's quick despairing frown nor hear Link's swift intake of breath. Otto thought: what if the project failed?

Well, his bank owned a first mortgage on each ranch and a note signed by both partners, as well as a note signed by Link alone. If Sol Hastings took security against the youth and girl, Otto would have to bid against Hastings at a bankruptcy sale, in case it came to that.

Pieper relighted his cigar. If he kept their business he was certain to profit whether the partners succeeded or failed. Of a sudden he sat bolt upright, his thin bloodless lips going "tek! tek!" They stirred, tensely hopeful.

"Mind," Otto warned, matching his fingerprints, "I don't say this thing will succeed. Rash undertaking—rash and headstrong. I don't approve, against my judgment.

"But I concede it may. I sincerely hope it will. Er, and while I couldn't accept any reward for acting for this bank . . ." He paused significantly.

"Oh, we'll be reasonable about the price. You're the only man can buy an inch. Isn't that so, Helen?"

She nodded, scarcely crediting her ears. She watched their host draw a pad of blank notes from his desk and reach for a pen. "I'll ask you both to sign it. Jimmy!" the bank president called to his clerk bent over the huge ledger. "Bring me eight hundred dollars. How do you want it, Link? Tens, twenties, fifties? Mixed?"

He mopped his brow beaded with tiny drops of perspiration. "Gosh!" he breathed in vast relief. "Any way at all, Otto. Just so it's money!"

CHAPTER IX.

They hurried out of the Stockmen's Bank with the buoyant sense of treading on air. Once in the sunshine Helen stopped, impulsively pressing both hands on Link's arm.

"Oh!" she breathed, and her dark eyes glowed admiration. "I—I thought surely Mr. Pieper would refuse us. You were wonderful—wonderful!"

Staring down at her flushed, relieved face, he grinned. "We are lucky. But look here, Helen, that fifty acres comes out of my spread. Gosh!" He mopped his perspiring brow. "If Otto had turned us down I don't know how we'd finish the dam. Only a couple of days to go, too! We'd be ruined," he finished soberly.

"We are partners, Link, and I'll give part of that fifty acres when Pieper wants it. By the way, you didn't mention that you borrowed five hundred dollars from him the other day."

"Well," — guiltily — "that drain pipe for the ditches had to be paid for, an' the cement company was hollerin'. But shucks, I'll benefit more than you. We won't count that."

"Link, have we enough money to complete the dam?"

He was silent a moment. "I don't know. This eight hundred won't even square us with the boys on wages. I'm hoping it'll keep 'em quiet for a spell, though. It's plain we can't get another penny from Otto, but it wouldn't be honest to go to Sol Hastings at Atlas. All we can do," he said in a worried tone, "is hope for the best an' try to sell our steers for enough to see us through. A little dam costs big money, doesn't it?" he added ruefully.

Sheriff Ames Stephen across the street gestured as if to convey some information without Helen's knowledge. Link frowned and tried to make out the lawman's silent gibberish. Then his eyes travelled past Stephen, and he saw the high rear of the Flagstaff-to-Rawhide stage as it stood in front of the Half Moon Cafe.

At once he understood that Buzz Hamilton was home from the penitentiary. But the man certainly was nowhere in evidence along the street. Arriving while they were engaged with Pieper, Buzz had found no one to meet him, and more than likely he had drifted into the Half Moon for a drink.

A troubled look entered Link's grey eyes. He blamed himself for not meeting Buzz and starting him at once away from temptation. Was he to go back to drinking and gambling the moment he returned to Rawhide?

From inside his shirt he took the packet that was the eight hundred dollars of payroll money and extended it to Helen. Would you mind very much if I stay while you start back to your spread with this? I'll be along after while and we'll tend to payin' off the boys."

Helen accepted the packet hesitantly. "Why, no, I'll do that, Link. What you want to stay about doesn't concern our dam, does it?"

"No. To tell the truth, I—er—I'm goin' to have a surprise for you. Yes, sir, a mighty fine surprise." He chuckled. "But I'm not springin' it now. You'll find out in good time."

Her oval face relaxed in a smile. "Very well, Link." They moved to her pinto at the hitch rack a few feet away and he held her stirrup while Helen mounted. Once astride, she looked down at him a little anxiously. "You aren't going to—gamble?"

OLD PEOPLE FEEL YOUNG

Just because more years than you care to count have fled by on your life's calendar is no reason for *feeling* old. Age, after all, isn't a matter of years. It is a matter of health. Stay vigorous and you stay young. But how, you ask. Do it the way thousands of people of advancing years do. Take Wincarnis regularly. Wincarnis is a delicious wine, free from drugs, that brings you all the valuable elements of grapes combined with the highest grade beef and guaranteed malt extract. Its invigorating effect is almost magical—yet perfectly natural.

These valuable elements in Wincarnis give your ageing system exactly the stimulating nourishment it requires. They soothe your nerves, enrich your blood, and flood your whole body with almost youthful buoyancy and vigour.

More than 20,000 medical men have heartily endorsed Wincarnis. It is a great tonic. It will make you *feel* young again by creating for you new stores of strength and energy. Get Wincarnis from your druggist—Sales Agents: Harold F. Ritchie & Co. Ltd., Toronto. 39

Home Guide Aids In Lifting Heavy Burden of Colds

Brings Better Control of Colds for the Family — Easy to Follow

A GREAT HELP TO MOTHERS

Much of the heavy burden that colds impose upon Canadian families can now be avoided—with the help of Vicks Plan for Better Control of Colds. This practical home guide to fewer and shorter colds has just three simple steps:

1. To Help Build Resistance to Colds Live normally—avoid excesses. Eat simple food and keep elimination regular. Drink plenty of water. Take some exercise daily—outdoors preferably. Get plenty of rest and sleep.

2. To Help Prevent Many Colds At the first warning nasal irritation, sniffle or sneeze, use Vicks Va-tro-nol—just a few drops up each nostril. Va-tro-nol is especially designed for the nose and upper throat—where most colds start. Used in time, Va-tro-nol helps to prevent many colds—and to throw off head colds in the early stages.

3. To Help End a Cold Sooner If a cold has developed, or strikes without warning, rub throat and chest at bedtime with Vicks VapoRub. VapoRub acts two ways at once: (1) By stimulation through the skin, like a poultice or plaster; (2) By inhalation of its penetrating medicated vapors, direct to inflamed air-passages. Through the night, this combined vapor-poultice action loosens phlegm, soothes irritation, helps break congestion.

The worth of Vicks Plan to others has been demonstrated in clinical tests among 14,702 people—further proved in everyday home use by thousands.

What this commonsense, medically sound Plan can do for you and your family can be proved only by trying it. You'll find full directions for following it in any package of Vicks Va-tro-nol or Vicks VapoRub.

## Little Helps For This Week

Teach me Thy way O Lord, and lead me in a plain path. Psalm 27:2.

Lead kindly Light amid the encircling gloom,
Lead Thou me on;
The night is dark, and I am far from home,
Lead Thou me on.
Keep Thou my feet, I do not ask to see
The distant scene; one step enough for me.

God alone knows how to lead His children in the paths of holiness. He knows your character, its difficulties and hindrances. He knows exactly how each event, each trial or temptation will tell on you, and he disposes all things accordingly. The consequence of this belief, if fully grasped, will influence your whole life. You will give yourself up to God more and more unreservedly, asking nothing, wishing nothing but what He wills, not seeking to bring things about for yourself but taking all He sends joyfully, and believe the one step set before you to be enough for you to take. You will be satisfied that even though the clouds are around you and your way seems dark he is directing all, and that what seems a hindrance will prove a blessing since He wills it.

Saskatchewan farmers sold a total of 209,643 pounds of branded beef during the month of January.

The original name of Voltaire, the French author, was Francois Marie Arouet. 2141

AIR-TIGHT wrapped separately

## The Social Credit Bill.

On Thursday last Premier Aberhart introduced his long awaited social credit bill, cited as "The Social Credit Measures Act," in the Legislature.

The bill makes no provision for immediate payment of $25 a month to every bona fide resipent of this province.

The bill, however, authorizes the Government to appoint a commission or other body to carry out an investigation on and to deal with and report on the 3 major phases of social credit, namely,

The Basic Dividend,

The Just Price, and

The Allowance to a dealer of a fair commission on turnover.

## Mike Goes to Hospital.

His friends here will regret to learn that Mike Bilinsky, the well known sports impressario and all round sportsman, is seriously ill in University hospital as a result of injuries received in a recent wrestling match which aggravated other injuries received several years ago.

Mr Bilinsky has staged several entertainments in Stony, including dances and boxing and wrestling bouts.

## Sparksie Says.

A good way to get your name in the paper is to spend the week-end trying to see how many other cars you can pass—especially on hills and curves.

"A woman cannot powder her nose, steer a car, and wave to a friend all at the same time," says a motor magazine. Well, mebbe not, but I've seen some girls try it."

## Back from B. C.

Mr John Litzenberger, who left this district about a year ago to go fruit ranching near Chilliwack B.C., returned to Stony Plain a short time ago. Last week he unloaded a carlot of stock and goods, shipped from his British Columbia ranch. Mr Litzenberger is expected to resume operations on his former location west of the War den Schoolhouse. Mrs Litzenberger left Chilliwack on Tuesday, March 4.

## "Jasper Highway Farms."

Mr Larry H Higgins, the well-known realtor, on Friday installed a large sign on his office front on the Bank of Montreal building, on Main street. Mr Higgins reports business in his line as being very good, and the prospects for a big tuenover in farm property during the coming season are very encouraging. Mr Higgins thinks we have had enough cold weather for this season, and believes if this break in the weather continues, we are liable to have Spring much sooner than we were led to believe a few weeks back.

## Large Family Units.

The St. Paul district can boast several families with many children. Here is a list of some, as given in the Edmynton Journal. March the 5th:

Ephriam Doucet, 25 children
Joseph Leroux, 22
Celeston Hurtubise 22
Adelard Ayote 20
John Krakowski 19
Phidine Joly 17
J N Doucet Junior 15
Joseph Girard 13
L Joly 13

## General Motors Give Bonus.

The president of General Motors Corp. announced last week more than eleven million dollars in cash and General Motors common stock has been distributed to Canadian and U.S.A employes in the annual disbursement under the Corporation's employees' savings and investment plan.

## Daddy Left the Papers.

An honest farmer, living down the river, was asked recently why he did not subscribe to a newspaper.

"Because," said he, "my father when he died, left me a good many papers, and I haven't read these thru yet."—Le Progres du Hull.

## Would Like Company.

"Now, in case anything should go wrong with this experiment," said the professor of chemistry, "we and the laboratory with us will be blown sky high. Now, come a little closer, boys, in order that you may follow me."

## Inga M. D. Poundkeepers.

S.E. 16-53-2-5, A. J. Matthews, Carvel P.O.

N.E. 3-52-3-5, Scott Bell, Duffield P.O.

COMPLETE YOUR TRAVEL ARRANGEMENTS AND BUY YOUR Steamship and Rail Tickets FROM THE LOCAL AGENT, CANADIAN NATIONAL Rail and Steamship Lines

## Stony Plain and District.

Mr L Wudel's implement building is having some extensive alterations made to it.

"Hearts of Humanity," the film shown here on Saturday, drew a fair audience. Mr. Kelly is making an effort to have the operator come out every week.

Mrs A P Anderson is undergoing treatment in a City hospital.

Spring is just around the corner, so says Clarence Lory, who is back in the chick business; taking orders for live chicks, light or heavy breeds.

Lutheran services in English will be held in Stony Plain next Sunday evening by Rev H Kuring.

Barber Altheim, formerly at Carvel Corner, has opened shop in Bill Miller's billiard parlor.

New and second-hand text books for public and high schools on sale at The Sun Book Shop.

BUTTER AND EGGS WANTED at The Royal Cafe.

## Stony Plain Town Council.

Stony Plain's 1936 Town Council held its inaugural meeting on Thursday, March 5, with Mayor R M Oatway presiding. There was quite a rush of business on hand to be dealt with, the Council being in session until "the mee sma' hours ayont the twal'." Several delegations were present during the evening. The standing committees of the Council were appointed as follows:

Fire & Building — Anderson, Miller.

Roads — Mayer, Armbruster.

Light & Sanitation—Hardwick, Kowensky.

The Mayor ex officio member of all committees.

## Co-operation Suggested.

A small saving could be made annually by reducing the number of members in the Legislature. Members will return after the session beseeching voters to be patient and bear the burden. The voters would appreciate a little co-operation, and this can be realised by a few of the back benchers and "Yes men" being elimination Co-operation works both ways. — Peace River Record.

## New Theme Song.

According to The Vancouver Province, Alberta is working out a new theme song, something like this;

My Douglas is over the ocean,
My credit is over the sea.
My Douglas stays over the ocean,
O bring back my credit to me.

**DANCE**
At Holborn Hall,
**FRIDAY, MAR. 20**
Ursel's 4-Piece Orchestra.

"A SIMPLE little thing," declared Prof. W. B. Cartmel, of the University of Montreal, sitting in the book-strewn study of his Westmount home where, for some months past, since his retirement from the Northern Electric Company, as mathematical expert, he has worked out the highly complicated mathematical formulas by which he attempts to disprove the Einstein theory of the non-existence of ether and the constant speed of light.

Addressing the American Physical Society in New York recently, he took his audience by surprise when he showed them that the slight difference observed between the velocity of light in the two beams reflected upon the interferometer in the original telescope experiment many years ago was not an error as Einstein maintains, but was just what should be expected, and indicates an "ether drift" and proves Newton's third law correct and logical. "In any case," says the genial professor with a merry twinkle in his eyes, "they have got to 'show me' by better proof than they have yet brought".
